

HIGH PERFORMANCE CAST TRUCKS

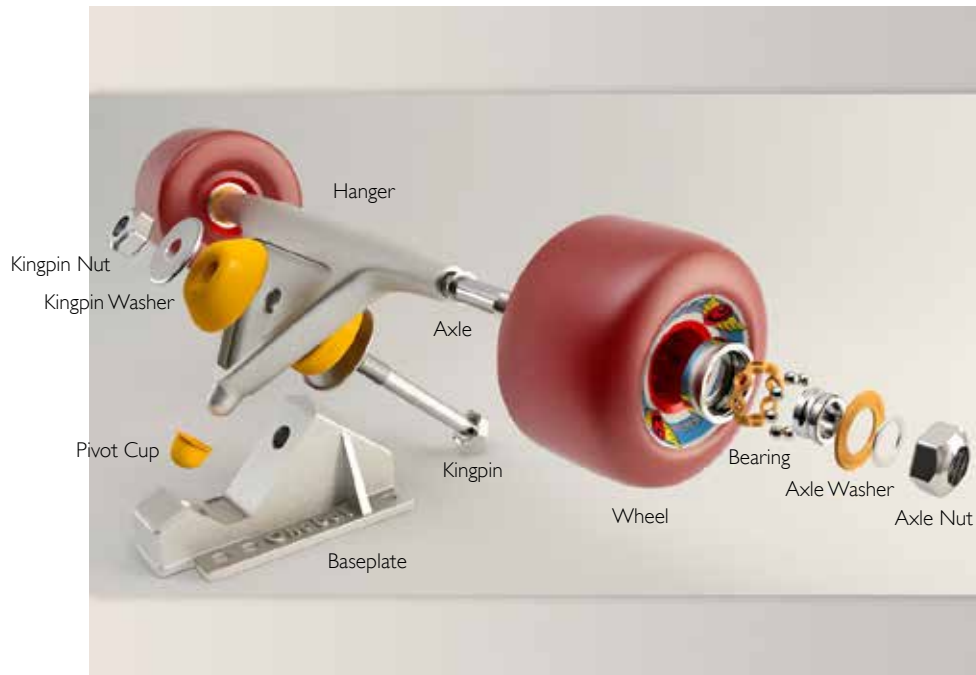

Information Sheet

Wever has over 30 years of experience in casting high performance cast skate trucks.

All of our trucks are cast from permanent molds using only virgin 356 aluminum and subsequently T6 heat treated to produce strong high density cast aluminum bodies. Axles and kingpins are made out of hardened Grade 8 Carbon

Steel or Chromolly Steel to further strengthen the overall structure.

A set of truck includes 1 x hanger, 1 x baseplate, 1 x pivot cup, 1 x kingpin, 2 x kingpin nuts, 2 x axle nuts, 2 x kingpin washers, 4 axle washers (bushings, wheels and bearings are not included).

SPECIFICATION

ITEM	MATERIAL
HANGER	VIRGIN 356 ALUMINUM
BASEPLATE	VIRGIN 356 ALUMINUM
AXLE	GRADE 8 CARBON STEEL CHROMOLLY STEEL
KINGPIN	GRADE 8 CARBON STEEL CHROMOLLY STEEL
KINGPIN/AXLE WASHERS	STEEL
PIVOT CUP	HIGH IMPACT RUBBERIZED PLASTIC
HEAT TREATMENT	T6 HEAT TREATMENT
